

Dear Kenwood School Parents,

A big thanks to all for participating in the self-test at home antigen testing we sent home last week! We appreciate your support on this so we can keep our school open as we get through this Omicron surge together.

This week I wanted to provide all of you the top 3 Covid-19 related Questions/Answers that we have been addressing over the past couple of days.

1. What is the definition of “being vaccinated” for 5-11 year olds?

Any student age 5-11 is considered to be vaccinated if they have had their second dose of a vaccine at least 2 weeks ago.

2. Someone in my home tested positive for Covid, is my child allowed to come to school?

If your child is Unvaccinated: Your child MUST stay at home for 7 days after the last contact with the Covid positive person. The student can test on day 5 or later. If the student tests negative, they can return to school day 8. The number of days your child is out of school may increase beyond 7 days if your child tests positive on day 5, or if you are unable to have your child tested. The office team has specific criteria pending each circumstance and you are advised to contact us to help guide you through specific protocols. 707-833-2500.

If your child is Fully Vaccinated: If your child is not experiencing any Covid related symptoms, your child may continue to come to school and test on Day 5. They will need to continue to wear a well-fitted mask and monitor any symptoms closely. Should any symptoms develop, please test your child immediately and keep them home until you secure a negative test and they are symptom free.

In both cases the COVID positive person should isolate in the home as much as possible. Good hand hygiene, masking and ventilation is also recommended.

3. My child who attends Kenwood School just tested positive for Covid, how long are they out of school and what do I need to do?

First, please inform our office immediately... it is recommended you also reach out to your child's pediatrician. Your child must stay home and isolate for at least 5 days. Isolation can end if symptoms are not present or are resolving, and your child must test negative on Day 5. This will allow your child to return to school on Day 6. If your child continues to test positive, and/or symptoms are still present, they may return to school after Day 10.

We know this is a very complex process to manage as we continue to navigate the waters of the ever-changing guidance coming our way from the State and County. We hope this Q/A gave you a better understanding of the recent California Department of Public Health guidance changes and the different scenarios depending on if your child is vaccinated or unvaccinated.

As always should you have any questions, please contact me at our office at 707-833-2500

Stay Safe,

Nate Myers

Please see the following link for a message from the Sonoma County Office of Education regarding COVID-19.

https://www.scoe.org/pub/htdocs/news-archive.html?news_id=1420

Upcoming Dates:

- 1/17 Dr. Martin Luther King Jr. Day: No School
